

There is a reason we put our names on the 'No Call List' and that is to not be disturbed by telemarketers, no matter if they are a bank or some other company. If we don't want to do business with that company then why should they have the right to keep harassing us after we've put our name on that list. A 'No Call List' means just that, don't keep calling us. It was bad enough during the elections when the political parties kept calling and I don't think they should be allowed to do that either. And please, don't let them start calling the cell phones. Why do you think more people are going to cell phones than having hardlines. Thank you.
